DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

In response to "applicant amendment to the drawing in figures 3 and 4 received on 8/1/2012 and the telephone conversations regarding said drawings on 8/1/2012", the following action has been taken:

THE PROSECUTION OF THIS CASE IS CLOSED AS OF THE DATE THE NOTICE OF ALLOWANCE WAS MAILED ON May 1, 2012.

The drawing correction has been approved by the examiner and the objection to the drawing indicated in the notice of allowance mailed on May 1, 2012 has been withdrawn.

According to the telephone conversation with applicant's representative Mr. Colin Cicotte (Reg. # 63,450), examiner agreed to include the conversation in order to make it as part of the record and the nature of the conversation is as follows: To better convey the drawing, we've labeled the waveforms as "FSK" and included binary ones (1) periodically underneath the waveforms for each sine wave in Figures 3 and 4. The FSK labels along with the binary ones show that FSK is used with those waveforms and that the waveforms are communicating a string of binary ones as data. While other waveforms using FSK are possible (e.g., alternating binary zeros and ones (0101) with the frequency representing 1's or 0's been different according to the definition of FSK or all binary zeros (0000)), the waveforms depicted in Figures 3 and 4 should meet Applicants' obligations under 37 C.F.R. § 1.83(a).

Any inquiry concerning this communication should be directed to Tesfaldet Bocure at telephone number (571) 272-3015. The replacement sheet includes labels indicating that the waveforms depicted in Figures 3 and 4 are not only a form of frequency modulation but also include FSK.

Attached with this correspondence is the accepted drawing correction.
